Célio Pimentel Costa Júnior

Blumenau, Santa Catarina

E-mail: celiopimentel@outlook.com| **LinkedIn:** https://www.linkedin.com/in/celiopimentel/

I'm a software developer on a constant learning road. Graduated in Information Systems from Estácio de Sá University, with experience in the last 6 years in Software Development, and focus on Fullstack development, working on innovative projects and with various technologies such as React, Angular, Node.js, C#, .Net Core, and Javascript.

EXPERIENCE

Fullstack Developer | Venturus – Remote — 10/2025 - Current

Working on the development and improvement of the product for a major strategic partner, focusing on building modern and responsive interfaces as well as enhancing existing features.

- Bug fixing and maintenance of existing features to ensure system stability and reliability.
- Implementing a new audience matching functionality across multiple regions.
- Developing unit and integration tests using Cypress and Jest to guarantee code quality and system robustness.
- Working with modern technologies such as Node.js, Docker, Kubernetes, Elasticsearch, Kibana and RabbitMQ to build and maintain distributed, high-performance applications.

Main technologies: Nodejs, Docker, Kubernets, Mysql, Elastic stack, Typescript, JavaScript, AngularJs

Fullstack Developer | Radix Engenharia e Software – Remote — 11/2023 – 10/2025

Project: Sotreq – Focused on front-end development, creating new features, and integrating with REST Apis. Also working on a legacy Project. Fixing bugs and migrating integrations for new Apis that are in development. Using BFF pattern for backend and Angular 14+ for frontend.

Main technologies: Angular, C#, .Net Core, Oracle Db

Project: Hydro – Fullstack development for a legacy Project, create new endpoint and improve chart from a web api with javascript vanilla.

Main technologies: C#, .Net Core, Angular, Typescript, MySql, Sql Server

Software Developer | Stone Age – Rio de Janeiro / RJ — 04/2022 – 11/2023

- Develop new features for our products
- Realize system integration
- Consume external APIs
- Legacy system maintenance

Main technologies: C#, Javascript, NodeJs, AWS, TypeScript, MySql, GIT, Jira, Scrum.

Fullstack Developer | Radix Engenharia e Software – Remote — 10/2020 – 04/2022

- Intern mentoring
- Front and Backend Feature Developments using React and C#
- Code Refactoring
- Code Review

Project: PrevisIA - AI platform to motinoring Deforastation in Amazon Biome. It was a project sponsored by Microsoft AI for Earth, Imazon and Vale Funding.

FrontEnd Static Developing using Html, Css and Javascript Vanilla. Customer meetings to refine and align developing.

EDUCATION

Bachelor of Science in Computer and Information Systems – Estácio de Sá University – 01/2018 - 06/2023 - Rio de Janeiro, RJ

ADDITIONAL COURSES

Electronics Certificate | Web Development | Harvard CS50

LANGUAGES

English - Advanced
